

ULF Tram ULF short Totallook

- **Format:** total format approx. 2343 x 305 cm each side

Separate print files for each part need to be produced with 3 cm bleed (T1-T14 und F1-F14).

Also contour cuts in window areas (T15-T20 und F15-F18) need an own print file, which also contains the cutting path. Only simple contour cuts are possible.

Send a general preview of all parts in correct order because of installation reasons and as an overview.

The window surface will be pasted with window film, all other with adhesive film.
The window panes are tanned in a brown-black shade.

Do not place any important elements or text in the pale green field.

M=1:100

The filesheets for the production details are constantly being improved and renewed. Please make sure you always download the actual version: www.megaboard.at/en/spec-sheets >> Version 2018-07-30

Print data preparation

- **Layout size** The print files have to be created in any aspect ratio to the final size.
If you use layered files or print files with mass of data please send an extra file as JPG or PDF (max. 5MB) as a check.
- **Pictures** Proportions and picture quality:
1:10 with 600dpi for viewing distances <6m
1:10 with 300dpi for viewing distances >6m
- **File formats** Please send print data as print PDF files.
You can also send layered files (Photoshop, Illustrator, Indesign).
Microsoft Office files cannot be used for production.
- **Fonts** Fonts should be converted into vector paths.
- **Logos** Logos should be converted into vector paths and embedded in the print file.
- **Colors** Printing data files have to be in CMYK mode. Spot and pantone colors can only be printed in screen and offset printing (high number).
An exact color specification (pantone definition) and a proof are needed for spot colors and CI-colors.
For optimal printing results we recommend you to send us a color-accurate proof. If there is no exact color definition, complains due to color deviations cannot be accepted.
- **data transmission** <15 MB by email: produktion@megaboard.at
>15 MB by file upload www.megaboard.at/file-upload
>100 MB by FTP: ftp.megaboard.at, user: Kunde, password: Kunde!01
>or on USB flash drive by post: Megaboard GmbH., Franzosengraben 10, A-1030 Vienna
